

# Hosted Firewall Service

## Protect your network and information assets without expensive security equipment.

Eventis Hosted Firewall Service protects your sites with an advanced, powerful, stateful firewall located in our network cloud. Many companies find it difficult to keep up with the strenuous regulations and requirements for securing their networks from the Internet. Firewalls are not set-and-forget devices. Instead of spending considerable resources on equipment and personnel, leverage Eventis' strong background in network security and this fully managed and hosted service to protect your assets, information, users and networks.

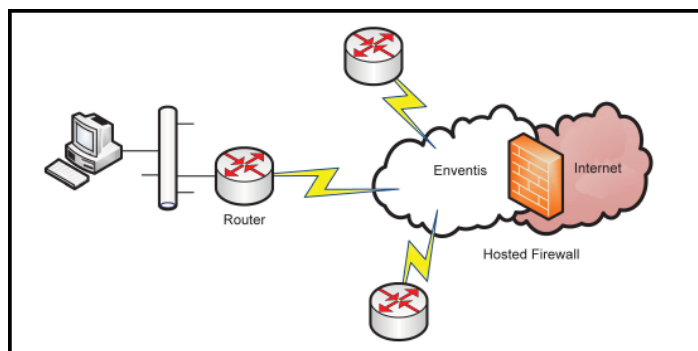

- Firewall "in the cloud" stops suspicious activity before it hits your network
- Leverage Eventis' experienced, certified security engineers
- Eventis can manage your firewall so you can focus on core IT activities
- Hosted Firewall for multiple sites creates enterprise-wide, consistent security
- Protects from intrusions and denial of service attacks
- Provides high performance, redundant, stateful firewall
- Hosted Firewall is monitored around the clock
- Hosted Firewall is a Cisco Powered Network certified offering

## Hosted Firewall Saves Money

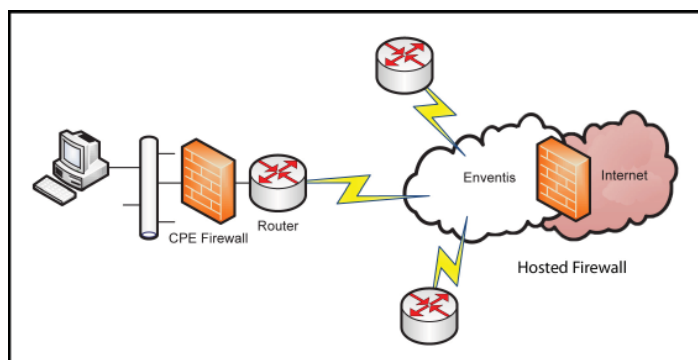

- Requires no capital equipment expense, no hardware maintenance contract
- Eliminates upgrades, repairs and technology obsolescence
- Relieves requirement for in-house security expert
- Ensures greater availability of network and application resources
- One firewall for all sites

## Standard Hosted Firewall

- Pre-defined Security Policy maintained by Eventis
- Static and many-to-one Network Address Translation
- 1Mbs to 45Mps (other bandwidth options available)
- Shared virtual firewall context
- Redundancy built in using stateful failover
- 24x7x365 Monitoring
- Custom Security Policies administered by Eventis (optional)

Hosted Firewall at customer site with no existing firewall

Hosted Firewall in conjunction with customer's existing firewall

## Enterprise Hosted Firewall (includes Standard features plus)

- Own Virtual Firewall Context
- Unique VLAN providing customer separation
- Performance reports
- Custom Security Policies administered by the customer

## Enterprise Plus Hosted Firewall (includes Enterprise features plus)

- Custom security policies administered by Eventis
- Mixed layer 2/3 firewall services providing node protection on the same LAN
- Multi-cast support for layer 2
